

The Lyme epidemic is exploding;

simply spending time in your backyard or snuggling up to a pet may put you or your family at risk for Lyme Disease.

"The Great Imitator," Lyme disease, presents various symptoms and is often hard to diagnose. Early detection is key to treatment and preventing complications that can have debilitating effects.

The average Lyme patient sees **5 doctors** over nearly **2 years** before being diagnosed!¹

Don't be a statistic, take control of your health - *get screened for Lyme today!*

Why wait for symptoms, be proactive & get screened!

There are 2 easy ways to get screened for Lyme Disease:

Join Us for a Local Screening Event

At our mobile Lyme event, you will have a personal consultation with an onsite healthcare provider and, if required, will be prescribed a GLD Test from Global Lyme Diagnostics — the latest Lyme specific test on the market. A simple blood draw will be completed onsite and sent to our CLIA lab.

Date	Time

Register online at glymedx.com today and join us at the upcoming Local Lyme Disease Screening!

Get Screened at Your Convenience

If you are unable to attend a local screening event, the GLD Screening Test is easily available to you and your family.

Visit glymedx.com/patients to order test kits.

The required Blood Draw may be completed at a Phlebotomy Lab or your Healthcare Provider's Office.

- Kits should be ordered in advance from glymedx.com/patients
- Fasting not required
- Draw blood any day of the week
- Results in 5-7 business days upon receipt

Visit glymedx.com for the science behind the GLD Test. Email questions to info@glymedx.com
